

WILI DIRIBA

wilidiribaaj@email.com | linkedin.com/in/wili-diriba-0a7296314 | github.com/wilidiriba20

Information Systems student at Addis Ababa University and Junior Full-Stack Developer with hands-on experience building desktop, web, and browser-based applications. Combines robust engineering skills across Python/Django, React, and C# with practical experience in AI data annotation and technical mentorship through ALX Ethiopia. Proven ability to implement layered architectures, manage complex relational databases, and deliver functional tech solutions to real-world problems.

EDUCATION

Addis Ababa University (AAU)

Expected Graduation: 2027

Bachelor of Science in Information Systems

EXPERIENCE

Data Annotator (Part-Time)

Mar 2026 – Present

R&D Group • Addis Ababa, Ethiopia

- Execute precise data annotation, labeling, and semantic tagging for machine learning and computer vision models.
- Maintain high-quality training datasets by implementing rigorous validation and quality assurance pipelines.
- Collaborate directly with machine learning engineering teams to optimize data pipelines for model training.

Program Mentor – AiCE Cohort 17

Jan 2026

ALX Ethiopia • Addis Ababa, Ethiopia

- Mentor peers and upcoming learners by providing structured technical guidance in generative AI and prompt engineering.
- Facilitate collaborative debugging sessions and structured learning groups to maximize program completion rates.

PROJECTS

MiniDARMAS System

C#, .NET, SQL Server

- Designed and built a secure, role-based desktop solution handling meeting workflows, transcription routing, and digital archives.
- Engineered the application utilizing a strict 3-Tier Hierarchical Architecture (Presentation, Business Logic, and Data Access Layers) to ensure clean separation of concerns.
- Implemented robust data access logic using ADO.NET for secure, real-time query processing and transaction tracking.

UniMart E-Commerce Platform

Django, JavaScript, PostgreSQL

- Developed a full-featured web application supporting user authentication, product management, dynamic review/rating structures, and an integrated live chat service.
- Designed a responsive UI integrated seamlessly with a PostgreSQL backend, optimizing database queries for smooth data retrieval.
- Managed state and handled environment configurations to ensure secure local and cloud execution settings.

Food Recipes System

Flask, Python, SQLite

- Built a lightweight recipe discovery platform featuring dietary restriction filters and custom user authentication profiles.
- Integrated external REST APIs to pull real-time culinary data while utilizing SQLite for fast, localized user-favorite tracking.

TimeLock Chrome Extension

JavaScript, HTML, CSS

- Created a lightweight productivity browser extension that blocks specified distracting URLs during targeted focus blocks.
- Utilized the Chrome Storage API to maintain user schedules, configurations, and state persistently across browser sessions.

CERTIFICATIONS

CS50x: Introduction to Computer Science (HarvardX), CS50: Introduction to Programming with Python (HarvardX), CS50: Introduction to Databases with SQL (HarvardX), Programming Fundamentals (Udacity), Data Analytics & Visualization Using Python (INFNOVA Technologies), Data Annotation with AnnotatePlus (R&D Group).

SKILLS

Full-Stack Development, Python, JavaScript, C#, C++, C, SQL, React.js, Tailwind CSS, Django, Flask, .NET Windows Forms, PostgreSQL, MySQL, SQL Server, SQLite, MongoDB, Git, GitHub, ADO.NET, REST APIs, Database Management Systems, System Architecture, Technical Mentorship.
